c. Ungkapan Kebahasaan

I personally think

I believe that

Finally, future generations may face many difficulties.

First of all, there is the problem of environmental pollution.

2. MATERI AUDIO

a. Transkrip Monolog

It's Earth Day and the campus is celebrating with some special events. One of the events is a seminar with an environmental activist. He is presenting his views on environmental issues.

1.ERIC :

Well, it looks like everybody's here. So, I'd like to welcome you all to this seminar. My name is Erick and my topic today is environmental protection.

In recent decades, environmental problems have increased as the result of human activities. Our actions are now threatening the health of our planet, the land we live in and work on, right? It is undeniable that environmental protection is very important. Let me give you some reasons. First of all, there is the issue of environmental pollution.

Pollution affects the health and lives of many people. We need a clean planet to stay healthy. It's simple, if we pollute our air and oceans, at some point they will no longer support us. Secondly, the temperature of the Earth's atmosphere is increasing. Global warming and climate change are real. Heat waves, drought, wild fires and floods are now more frequent and intense. We need to do something before it is too late. Finally, future generations may face many difficulties due to the environmental problems caused by us. We all have to live on this planet and we need to act responsibly for future generations. In conclusion, environmental protection is very important for us all. So, remember no matter how small or insignificant your actions may seem, they are important. It only takes one person to start a movement that can lead to positive change.

b. Task 1 (Extensive Listening)

Answer the questions by choosing A, B, C, D or E.

- 1) What is the talk mainly about?
 - A. A few steps to protect the environment
